

Sirs,I spend an average of 6 hours a day in my auto and enjoy something the NAB can not and has not provided in the past, a choice of what I want coming over my radio when I want it and where I want it. If the fat cat, wind bags were thinking and not complaining, they would have come up with satalite radio long ago. Let freedom ring, do not try to control our freedom of choice. Competition is the best way to improve our products and our lives.

Thank You,

Roger R Nelson
